

HONEST BUILDINGS CUSTOMER STORY

RUDIN MANAGEMENT

Landlord and developer with 14 million SF of commercial and multifamily properties in Manhattan

MICHAEL RUDIN, VICE PRESIDENT

“The Honest Buildings platform makes planning, executing and tracking our capital, TI and construction projects seamless because we can **use our own historical data to**

benchmark costs. Our team is thrilled that Honest Buildings automates many of the administrative and workflow tasks they used to perform manually so now more time can be dedicated to driving value. Additionally, our vendors, architects and general contractors appreciate having real-time access to data on each project because it keeps everyone on the same page.

With the platform in place, we have been able to increase revenue by delivering projects more quickly while simultaneously driving down costs by reducing change orders through more coordinated communication. We saw these results right away when we used the software for our own office renovation, and the entire team as a whole loved having visibility into the project.

As part of our sustainability initiatives we hope to one day be able to eliminate the use of paper to manage construction projects. My family has always been focused on making NYC a better place to live, work and visit, and using a tech platform like Honest Buildings that makes the process more transparent, efficient and collaborative makes complete sense. It’s been a great experience to work with the Honest Buildings team to help build a product that truly meets the needs of real estate owners like us.”
