

HONEST BUILDINGS

Providing Best-In-Class Security

PROTECTING YOUR TEAM AND DATA

Our platform infrastructure is built on a system of robust mechanisms and best practices that keep it strong and healthy, and keep your information safe. Our development process follows an industry-standard SDLC, which includes significant input from both existing and potential customers in shaping our formal product roadmap.

An independent auditor report confirms that Honest Buildings follows strict procedures designed to protect the security, availability, processing, integrity and confidentiality of our customers' data.

OUR SECURITY FEATURES INCLUDE:

- ▶ SSL-web server certificate providing the strongest browser encryption available, plus extended validation from Thawte.
- ▶ Servers located in the Amazon Web Services Cloud Computing platform, one of the most resilient environments available.
- ▶ Monitored firewalls, security logs, encrypted transmission of data and encrypted password storage.
- ▶ Annual third party risk assessment.
- ▶ Multi-factor authentication for all employees who have access to critical systems.
- ▶ Redundant data backups in multiple geographic locations.
- ▶ SSO availability.
- ▶ Database backups encrypted at rest.
- ▶ Realtime intrusion detection and server monitoring.
- ▶ Quarterly vulnerability testing.

*SOC 2 compliance report available upon request under NDA
SOC 1 compliance report expected by September 15th, 2018*

Industry leading CRE owners have managed and tracked over \$16 billion in capital and construction projects using Honest Buildings.
